Jenny,

I'm available from 11:30AM-1PM Eastern / 8:30-10AM Pacific, or after our Oregon call today. I was hoping to finish my updated New Dvpt rationale ahead of the call, but it's not the end of the world if that gets pushed off a few more hours. My cell is **Non-Responsive** but I'm tied up the next couple of hours. Talk to you later!

Don

Subject: Talking today

Hi Don - I decided to work from home today but left your cell phone number at work. Can you send again? Mine is **Non-Responsive** Do you want to talk after the CZARA call today, 11AM PST/2pm EST? Otherwise, I might be able to talk today around 7:30AM PST/10:30EST.

I didn't get anything in writing yet from Oregon DEQ, but I talked with the TMDL folks again yesterday, and should be getting something in writing. I have a feeling it will be more something like the TMDLs that are going to be done would cover around 60%, and for the DMAs that already have TMDLs, some will be using the DMA guidance in 5-year reviews if it's deemed that their pollution was caused by stormwater. Oregon DEQ is also starting an effort to put together LID guidance, and some DMAs with TMDLs already completed might be using that.
